

Validation Phase 3: Semantic Retrieval with Metadata Filtering

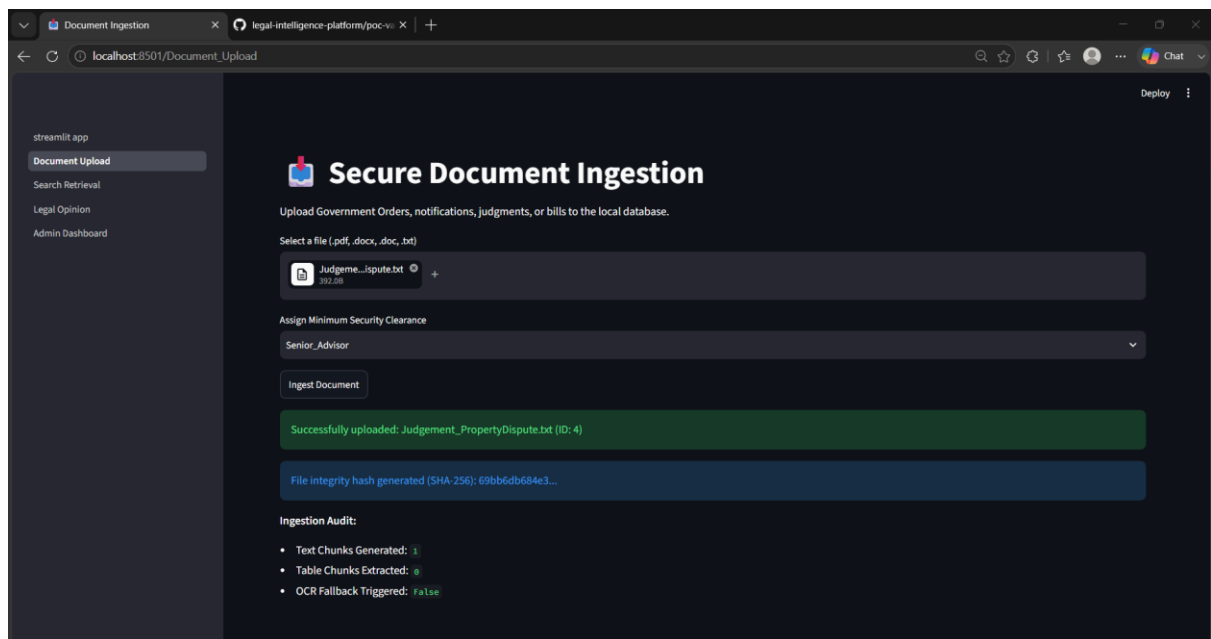

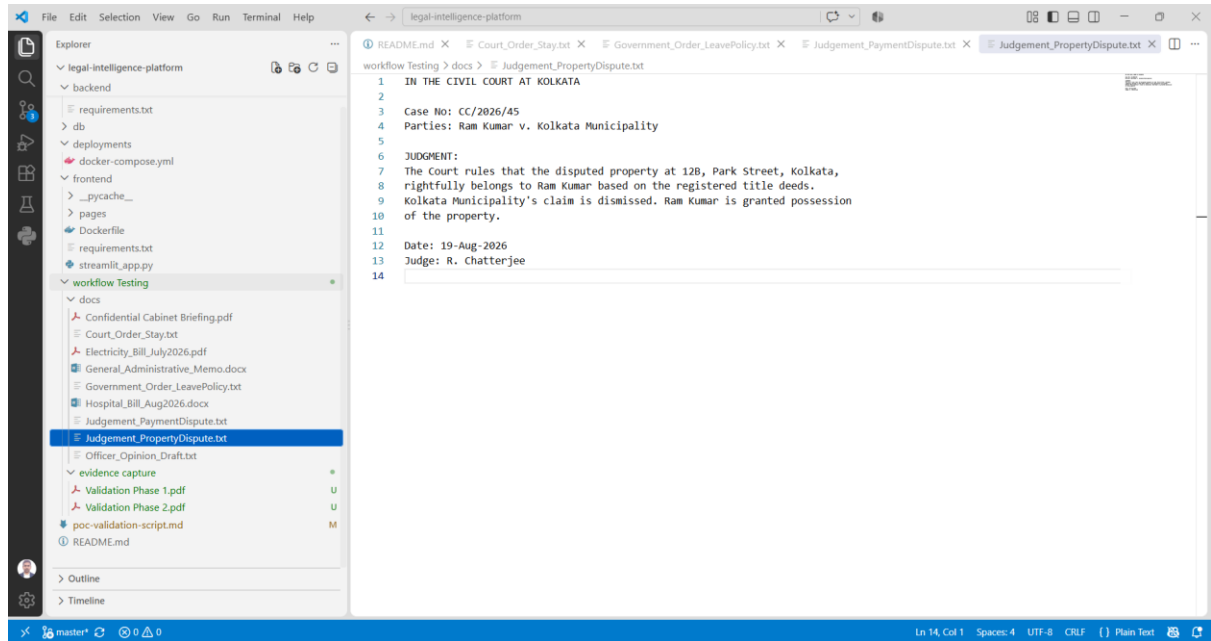

Objective: Verify that a user can only retrieve search context at or below their security clearance.

Setup for Search:

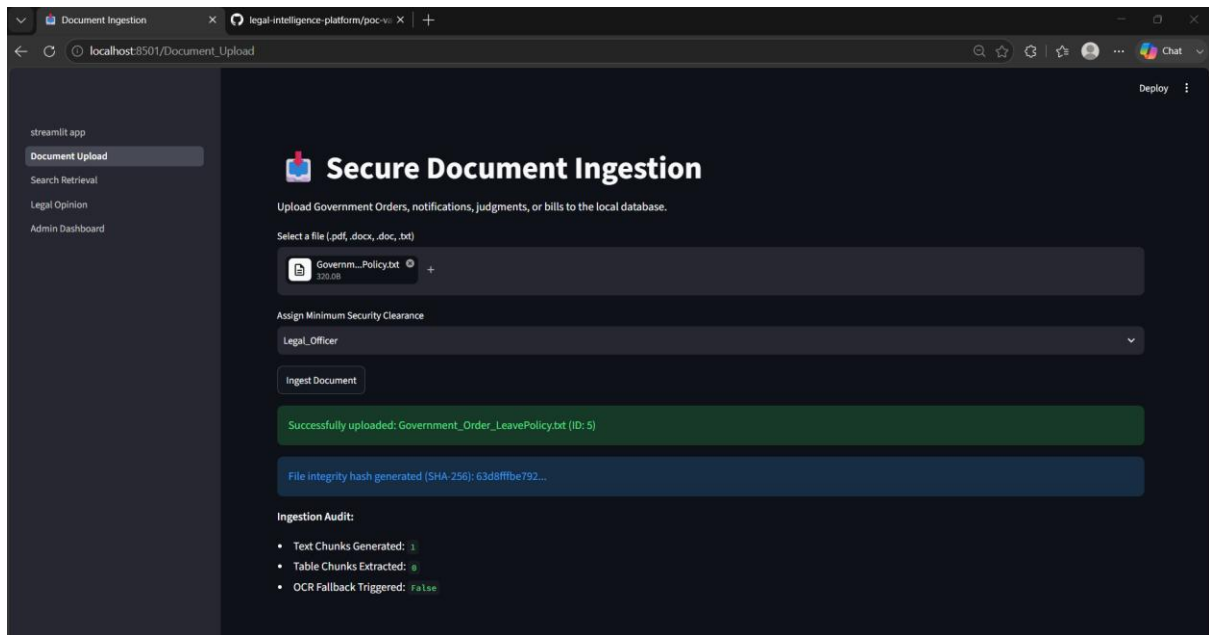

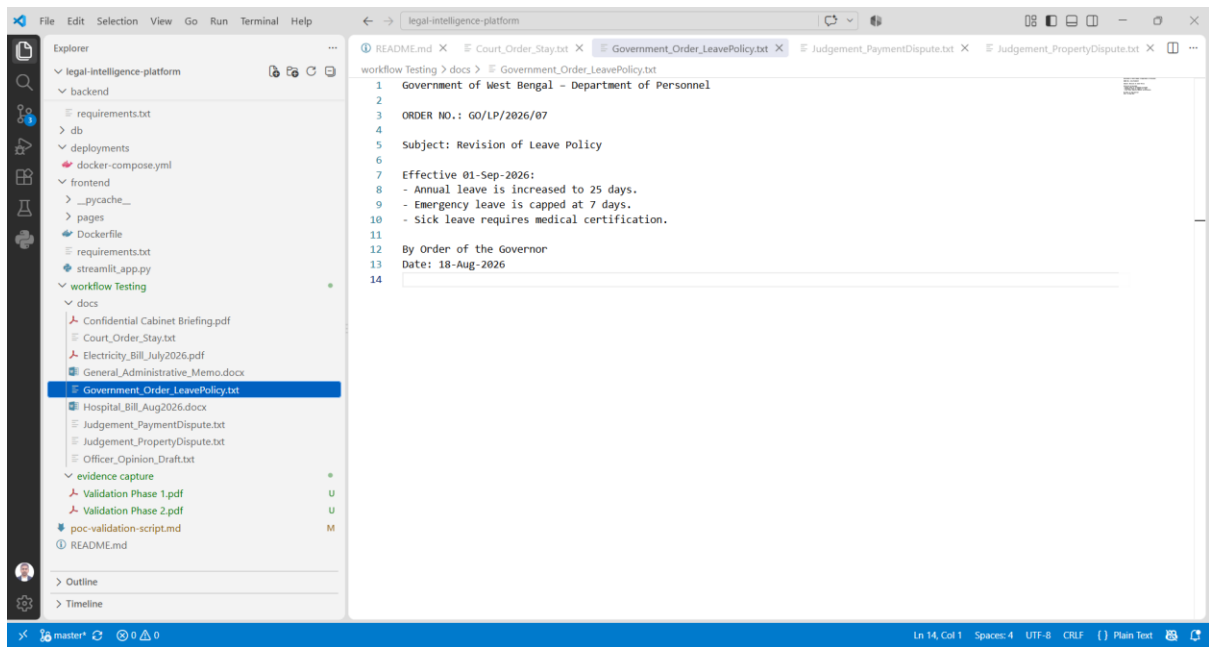

- File A is uploaded by admin with Admin clearance (e.g., "Highly Sensitive Cabinet Briefing.txt").

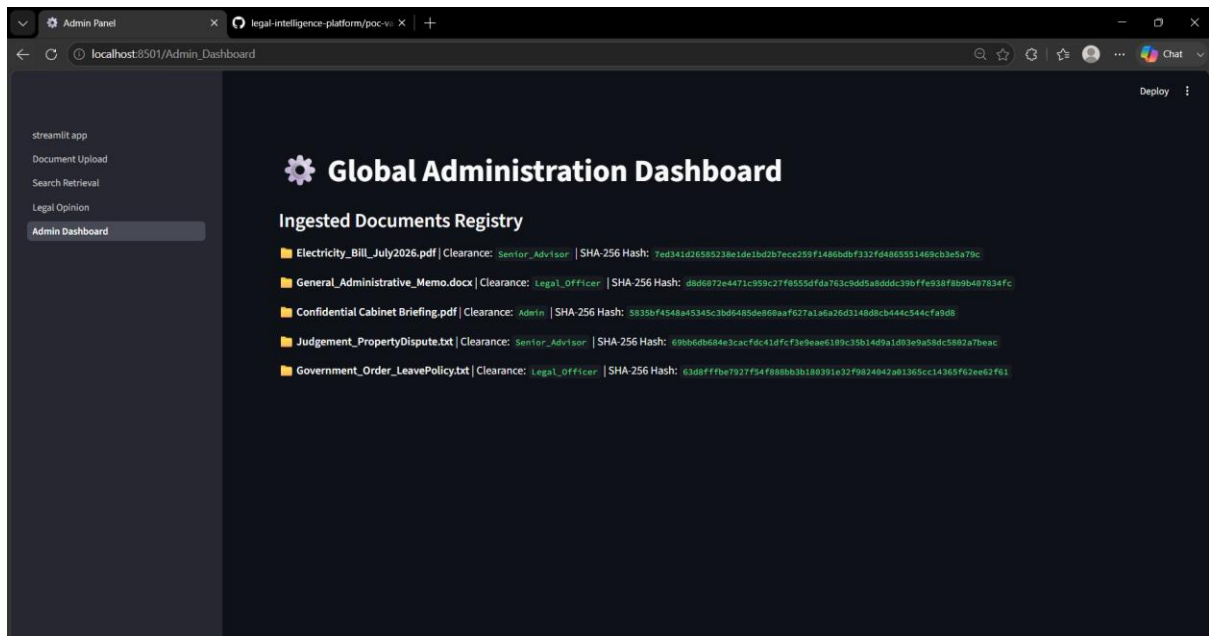

- File B is uploaded by admin or advisor_1 with advisor_1 clearance (e.g., "Judgement_PropertyDispute.txt").

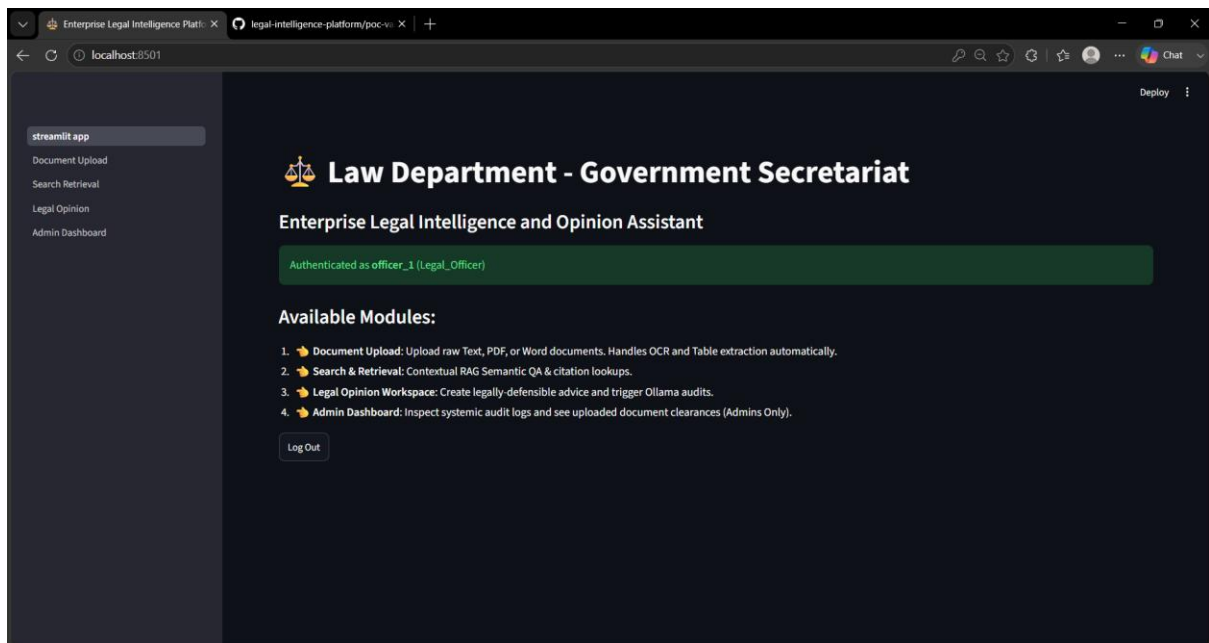

- File C is uploaded by admin/officer_1 with Legal_Officer clearance (e.g., "Government_Order_LeavePolicy.txt").

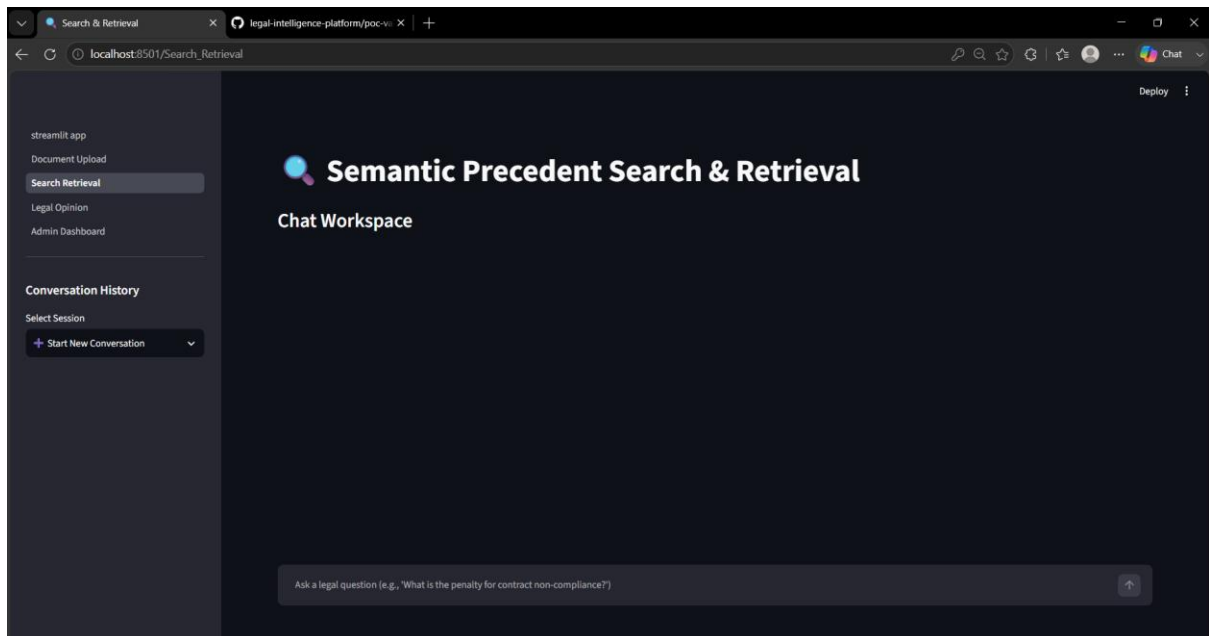

Test Scenario 3A: Search as a Legal Officer

1. **Step 1:** Log in as officer_1 / officer_1.

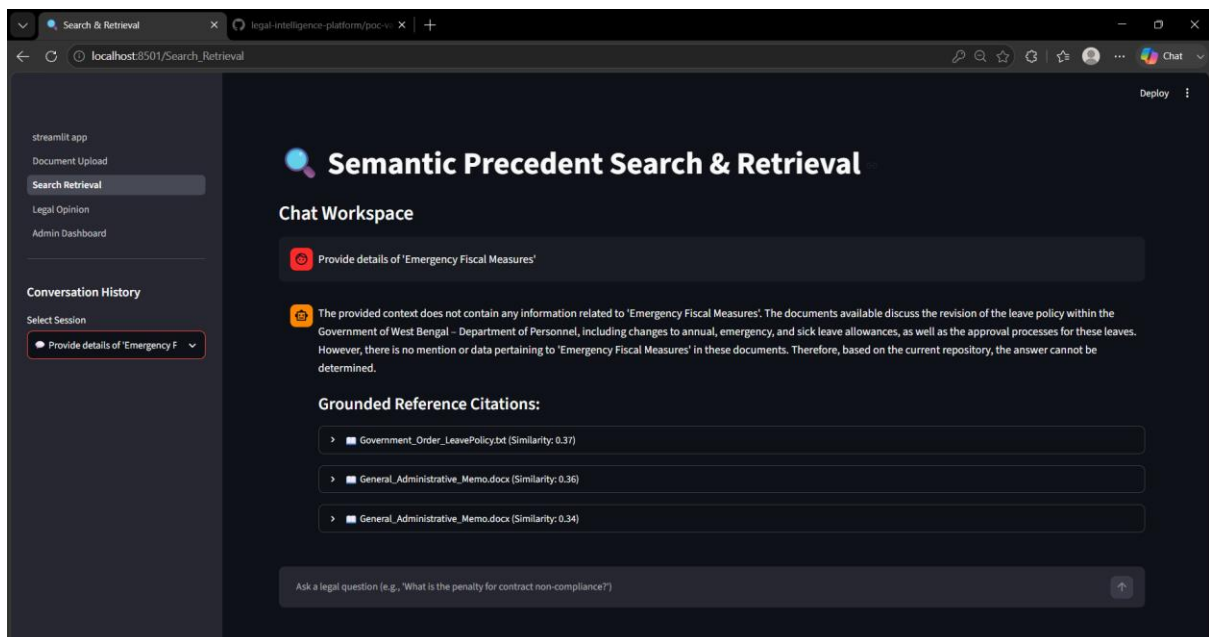

2. **Step 2:** Go to 🖱️ **Search & Retrieval**.

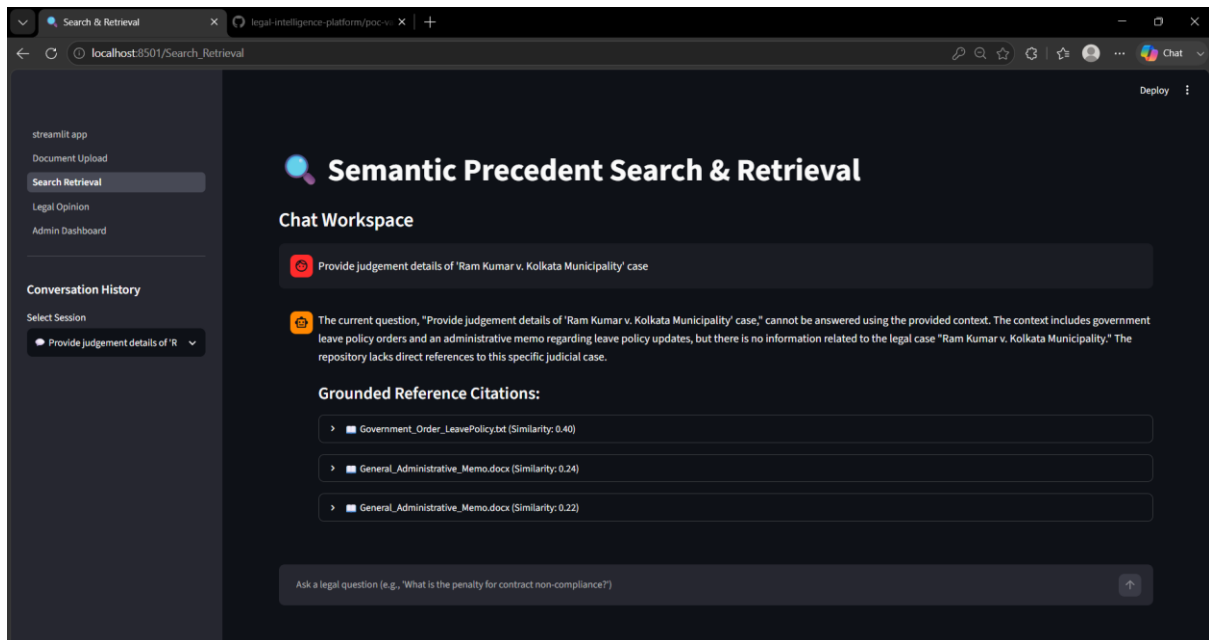

3. **Step 3:** Submit queries targeting content in File A (Admin-only), File B (Advisor-only), and File C (Legal Officer).

- **Expected Result:** Chunks from File A and File B **are completely ignored and excluded from retrieval**. Only matching chunks from File C are displayed in the grounded references expander.

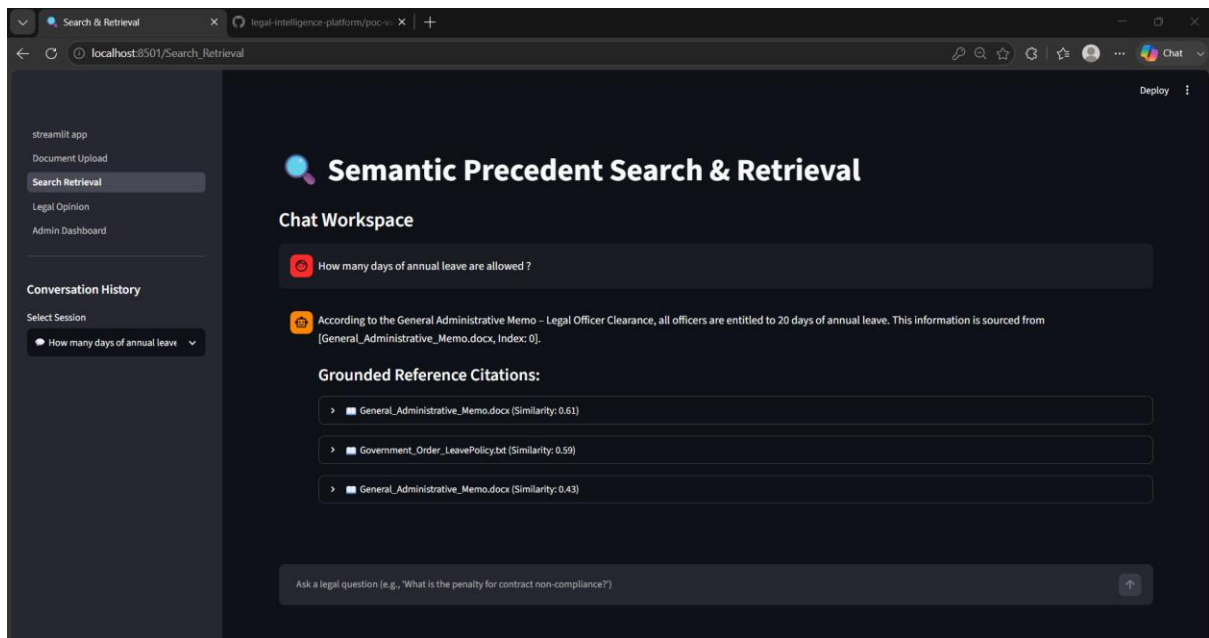

❖ Submitting query targeting - *Confidential Cabinet Briefing.pdf* | Clearance: *Admin*

❖ Submitting query targeting - *Judgement_PropertyDispute.txt* | Clearance: *Senior_Advisor*

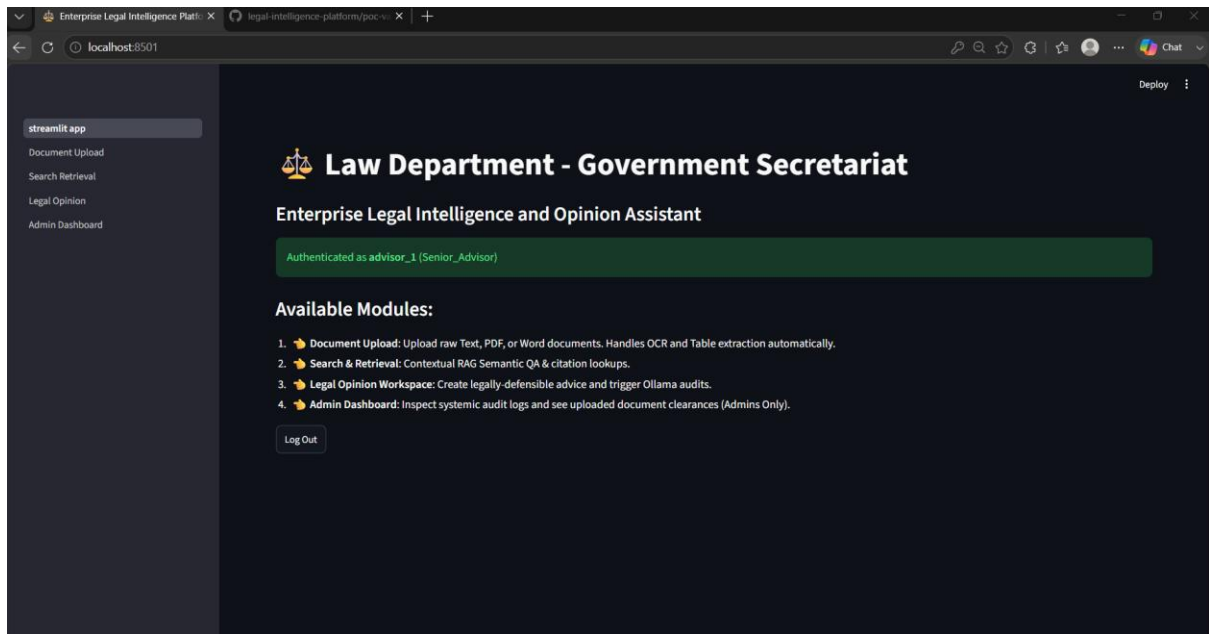

❖ Submitting query targeting - *Government_Order_LeavePolicy.txt* | Clearance: *Legal_Officer*

Test Scenario 3B: Search as a Senior Advisor

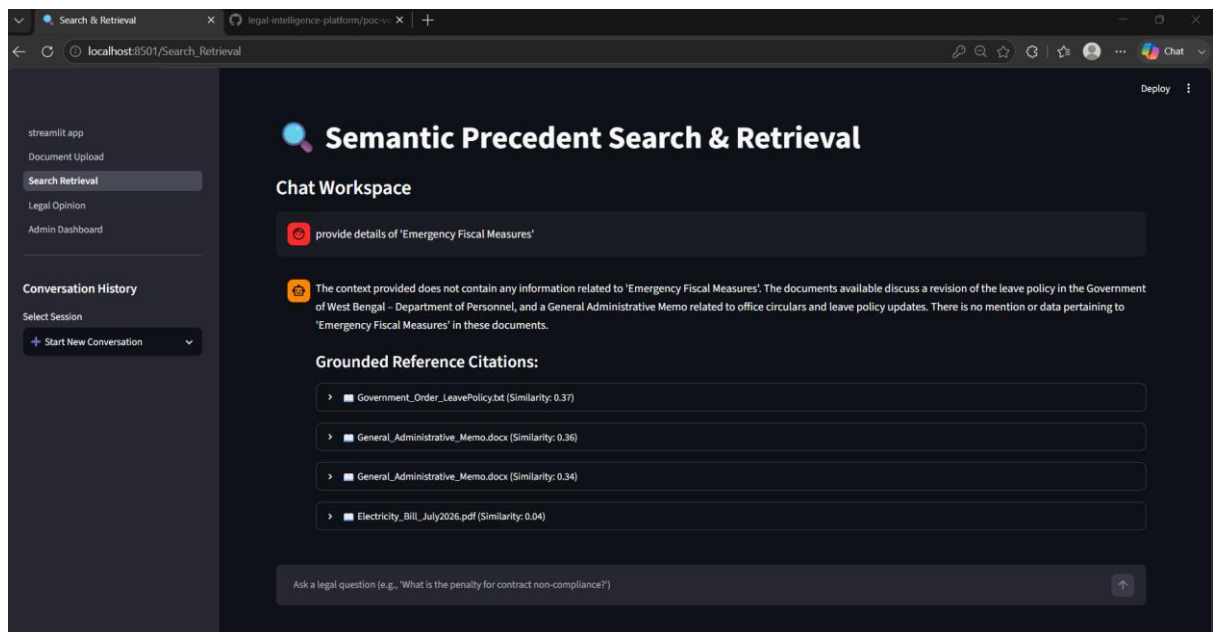

1. **Step 1:** Log in as advisor_1 / advisor_1.

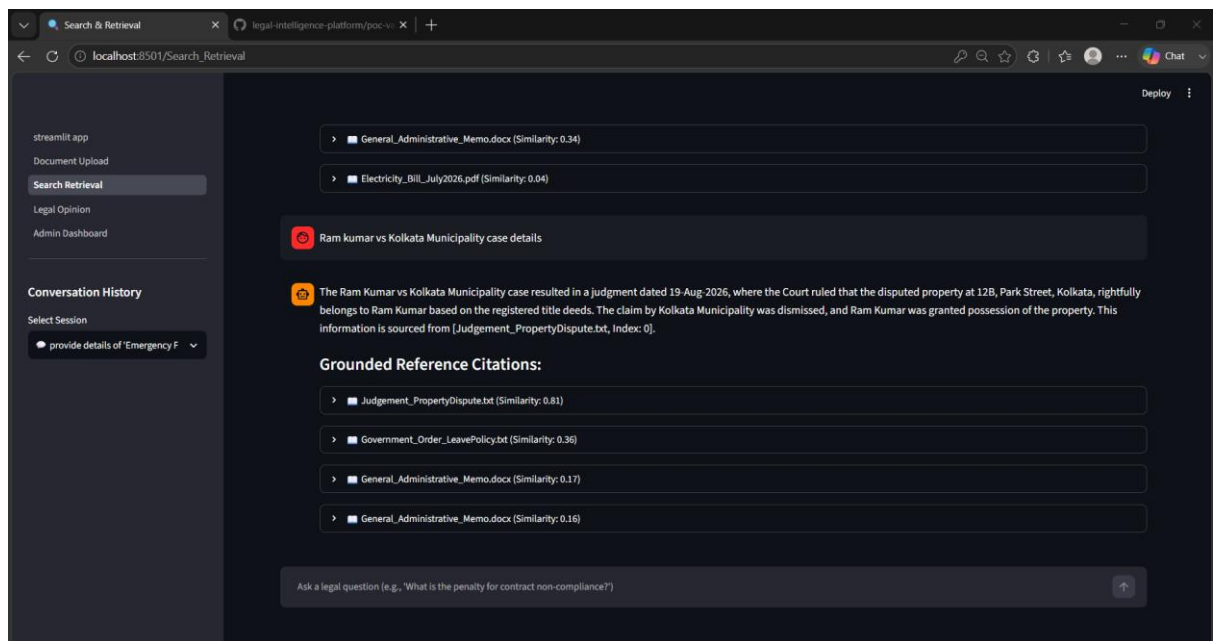

2. **Step 2:** Go to 🖱️ **Search & Retrieval** and submit the same queries.

- **Expected Result:** The advisor retrieves relevant context from File B and File C. The highly sensitive File A remains completely hidden.

❖ Submitting query targeting - *Confidential Cabinet Briefing.pdf* | Clearance: *Admin*

❖ Submitting query targeting - *Judgement_PropertyDispute.txt* | Clearance: *Senior_Advisor*

❖ Submitting query targeting - *Government_Order_LeavePolicy.txt* | Clearance: *Legal_Officer*
