

Validation Phase 5: Legal Opinion Workspace & Approval Status Flow

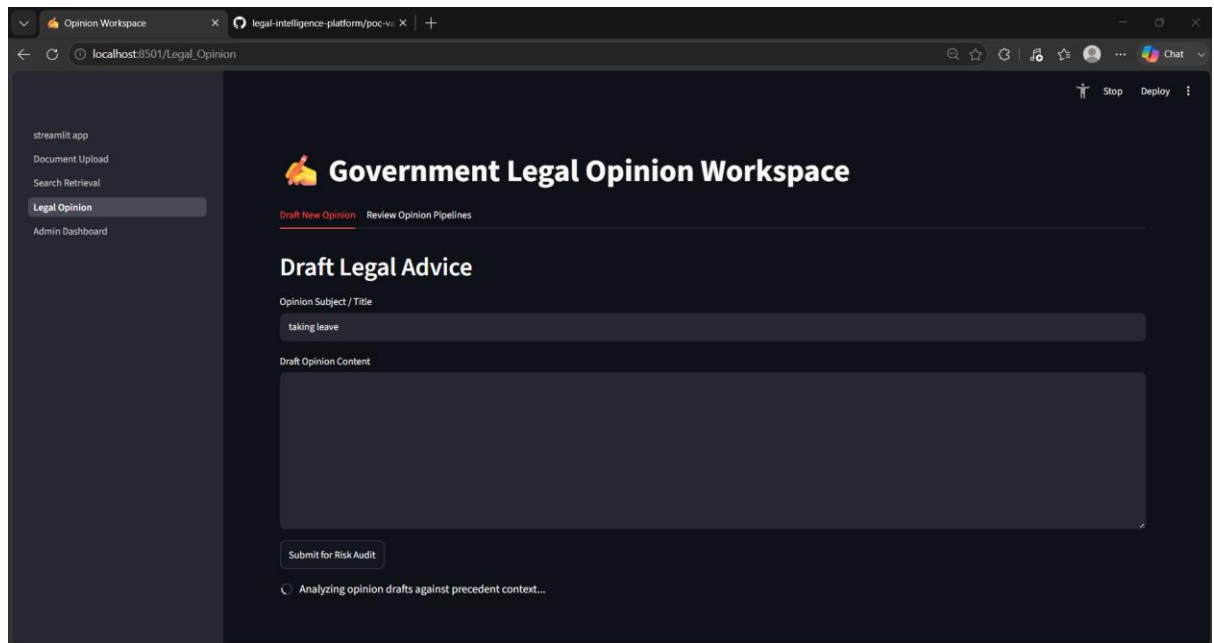

Objective: Verify the drafting, autonomous auditing, peer isolation, and advisor approval workflow.

Test Scenario 5A: Drafting and Risk Audit

1. **Step 1:** Log in as officer_1 / officer_1. Go to 🖱️ **Opinion Workspace**.

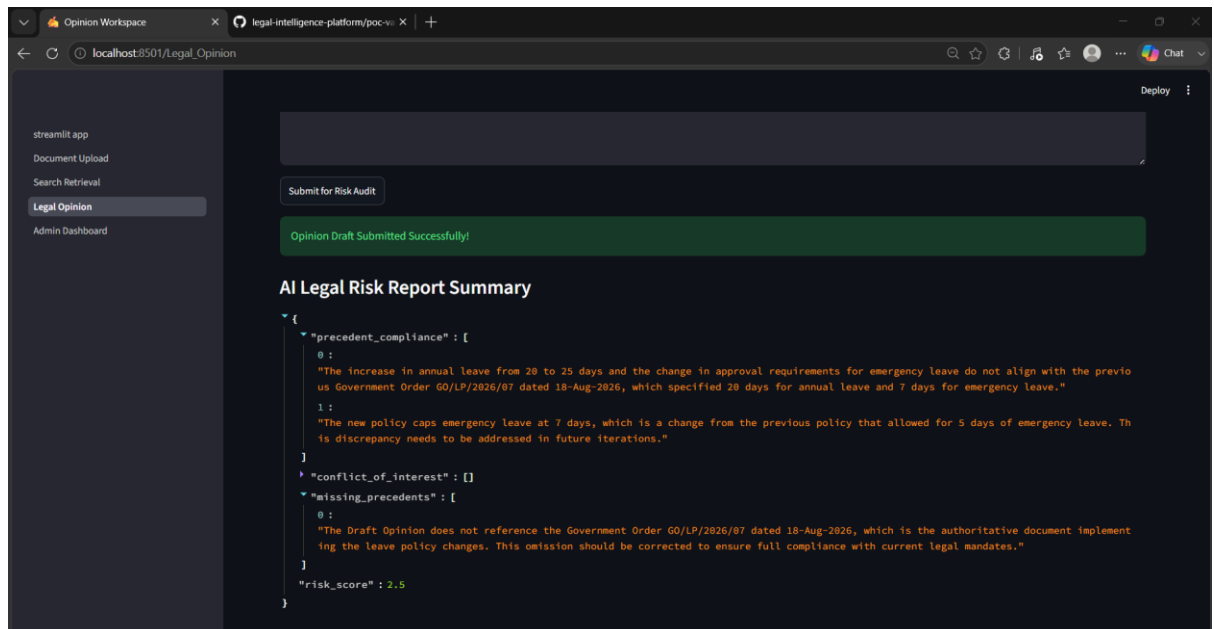

2. **Step 2:** Enter a title and draft opinion content (e.g., *"Withholding payment due to delay"*).

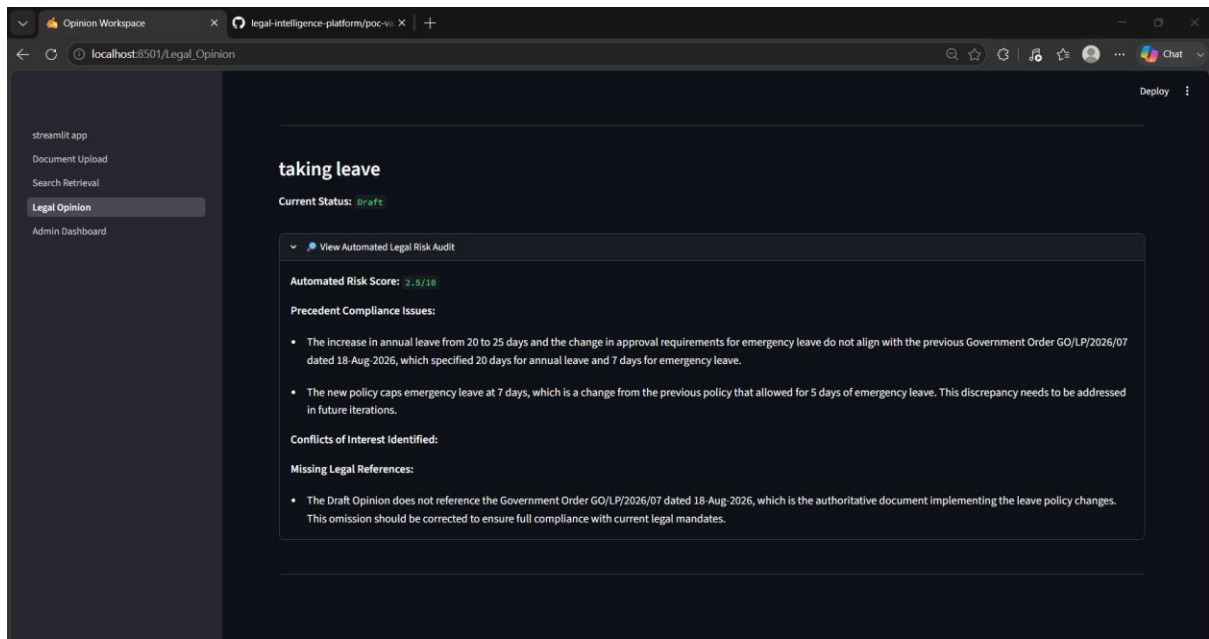

3. Step 3: Click **Submit for Risk Audit**.

- **Expected Result:** The local AI service (RiskService) analyzes the text against database precedents and generates an interactive, detailed **AI Legal Risk Report** covering compliance issues, missing citations, conflicts, and a risk score.

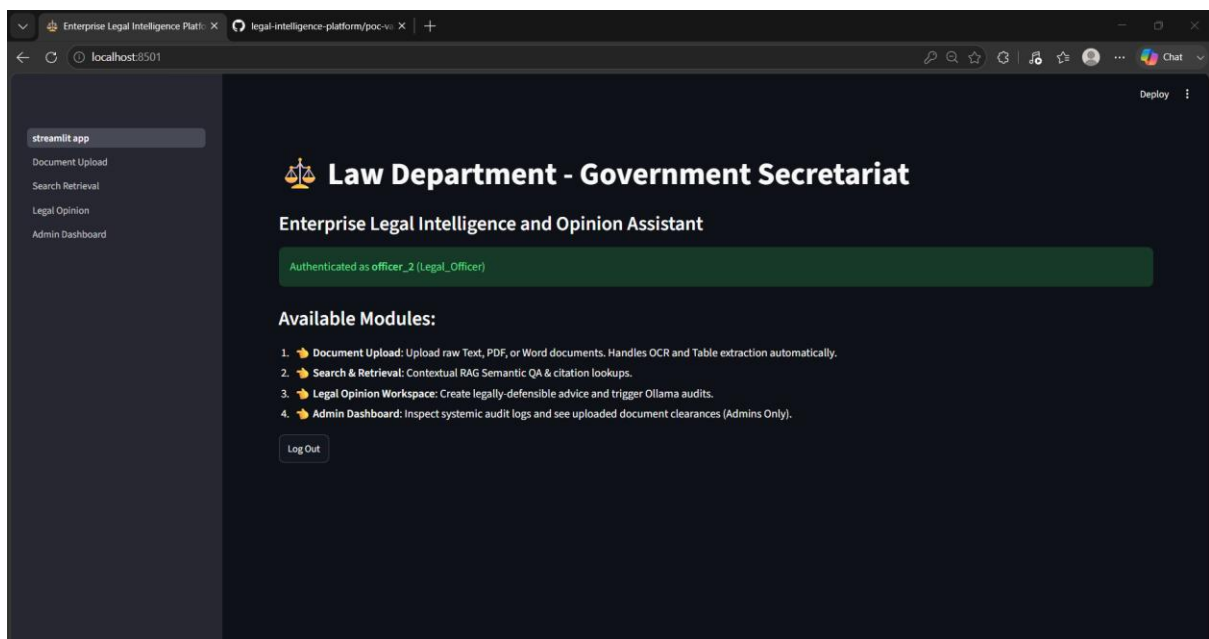

4. Step 4: Go to **Review Opinion Pipelines**.

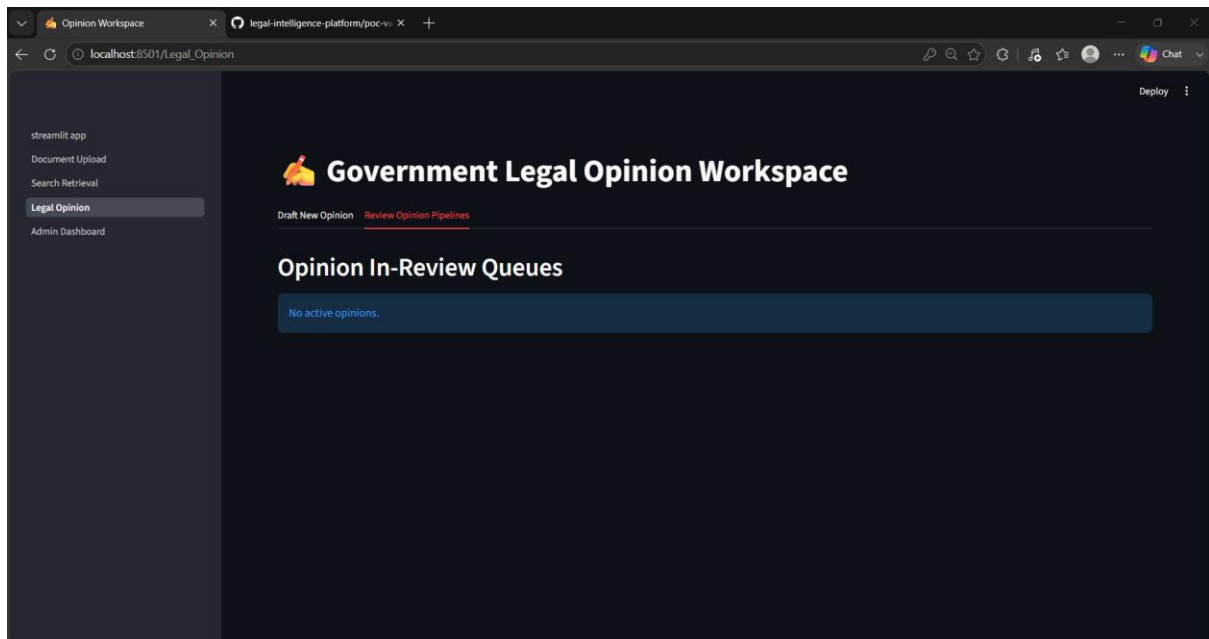

- **Expected Result:** The newly drafted opinion is listed. Its status is set to Draft. The status change dropdown is invisible to officer_1 (Legal Officers cannot self-approve).

Test Scenario 5B: Peer Isolation Check

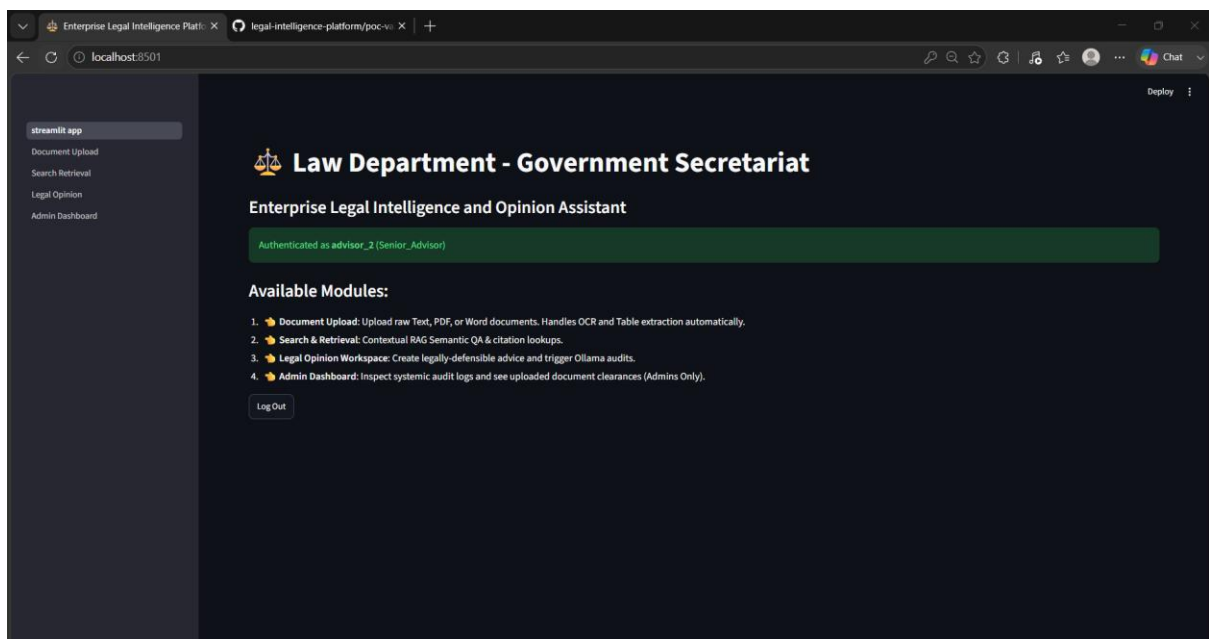

- Step 1:** Log in as `officer_2 / officer_2`. Go to  **Opinion Workspace** -> **Review Opinion Pipelines**.
 - Expected Result:** The list is empty. `officer_2` cannot view or access the opinion drafted by `officer_1`.

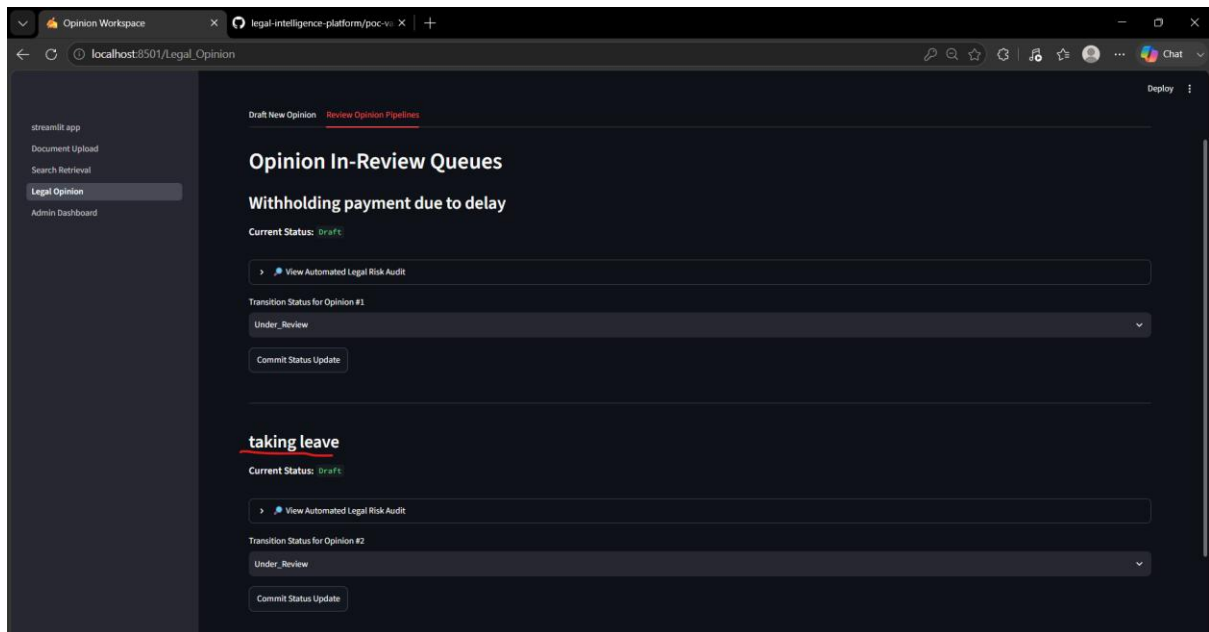

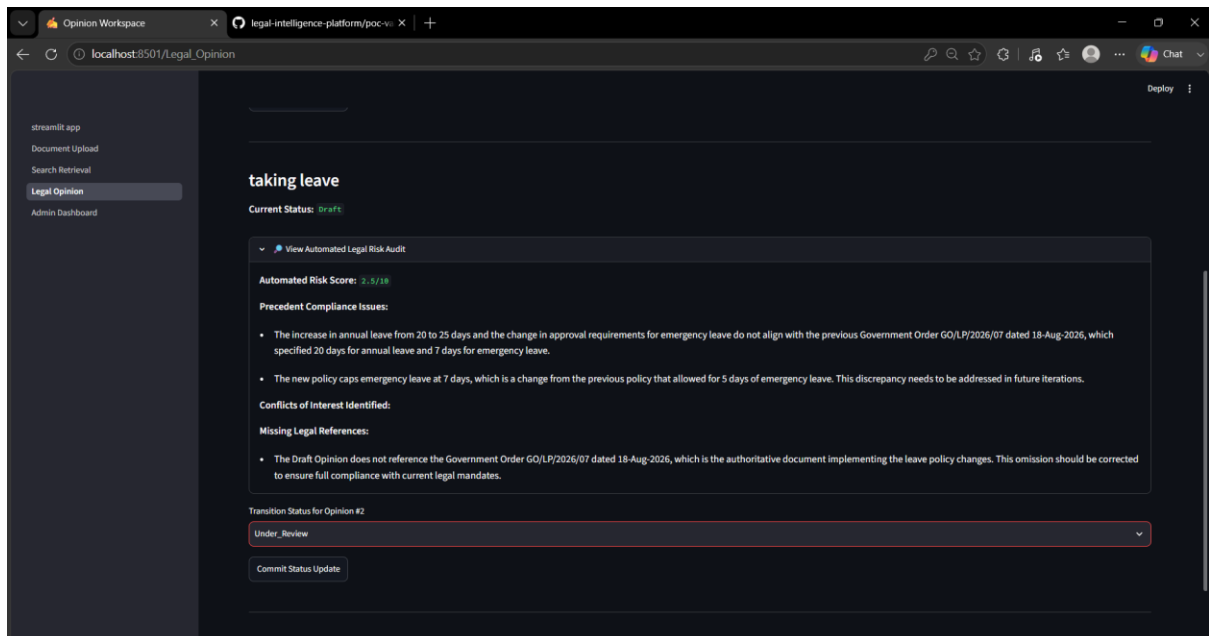

Test Scenario 5C: Review & Status Transition

1. **Step 1:** Log in as advisor_2 / advisor_2. Go to 🖱️ **Opinion Workspace** -> **Review Opinion Pipelines**.
 - **Expected Result:** The advisor can view the drafts submitted by both officer_1 and any other user.

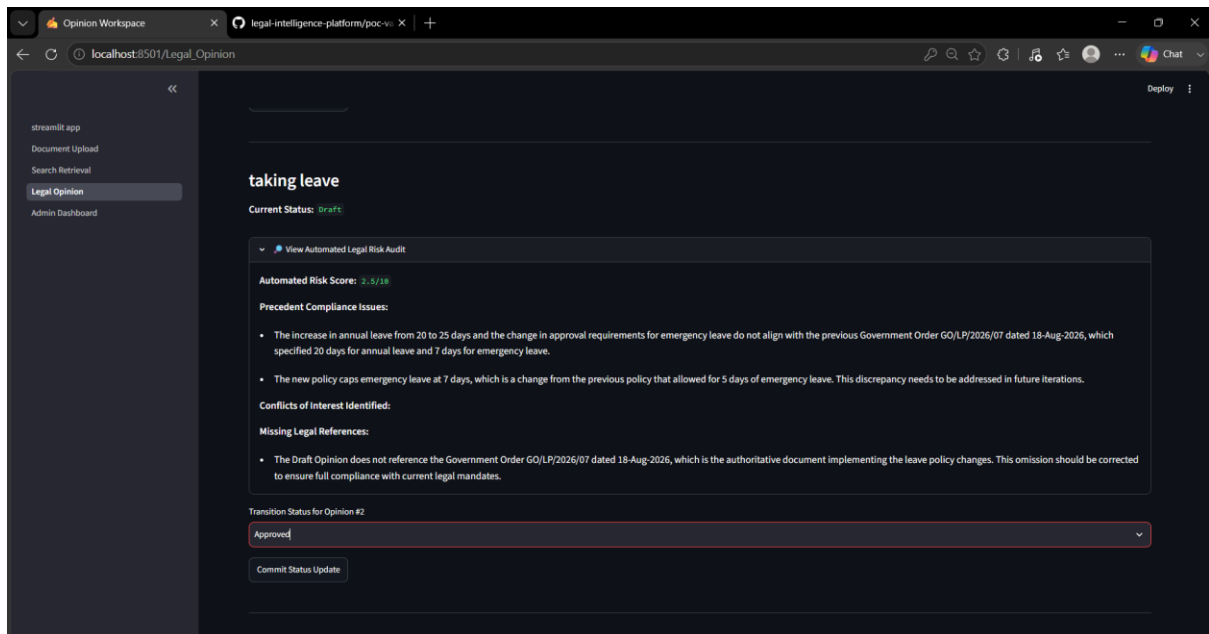

2. **Step 2:** Inspect officer_1's opinion draft and expand the AI Legal Risk Report.

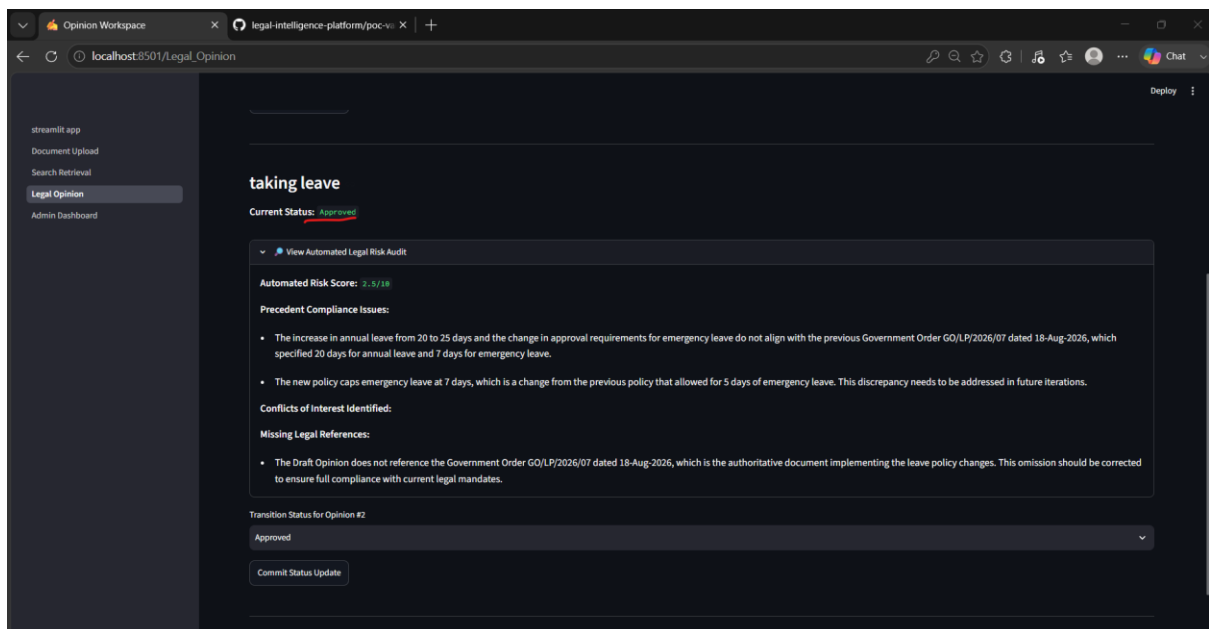

3. **Step 3:** Use the status dropdown to change the state to Approved.

4. Step 4: Click **Commit Status Update**.

- **Expected Result:** Screen refreshes and shows status updated to Approved.

Test Scenario 5D: Officer Verification

1. **Step 1:** Log in back as officer_1 / officer_1. Go to 🖱️ **Opinion Workspace** - > **Review Opinion Pipelines**.
 - **Expected Result:** officer_1's opinion status has been updated to Approved in real time, confirming a successful human-in-the-loop review chain.
